#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 4, 8, 9, 13, 14, 15, 20, 21, 22, 24 rejected under 35 U.S.C. 102(b) as being anticipated by Brum (4,852,455). Brum discloses a housing, a cable de-bailer rotatable mounted, a shaft independently rotatable mounted with the cable de-bailer, a spool for storing a length of the towing cable mounted on the shaft for reciprocating movement there along a brake mechanism, an anti-rotation device, a deployment mechanism mounted on the housing, a cable tensioning device, wherein the moving object is an aircraft and the cable is an electro-optic cable having an electrical conductor and a fiber optic conductor, wherein the cable extends continuously without interruption from the decoy to a cable terminus.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3644

4. Claims 10, 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brum in view of Spicer (4,978,086). Brum teaches every aspect of the present invention with the exception of a tensioning device being a coil spring, and wherein a tensioning device is engaged with the cable for maintaining tension on the cable. Spicer discloses a tension device being a coil spring and wherein a tensioning device is engaged with a cable for maintaining tension on the cable. (see Figure 1).

#### Allowable Subject Matter

5. Claims 2, 3, 5-7, 11, 12, 16-19, 22, 23, 25 and 26 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen A. Holzen whose telephone number is 703-308-2484. The examiner can normally be reached on M-F 7:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles T. Jordan can be reached on 703-306-4159. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 10/617,545

Art Unit: 3644
